

CLEAR CELL SARCOMA FOUNDATION™

Our mission is to make Clear Cell Sarcoma survivable through education and scientific research while ensuring all patients and caregivers impacted have a voice and platform to enact change and strive towards the cure.

The Clear Cell Sarcoma Foundation (CCSF) is a grass roots organization where helping those with Clear Cell Sarcoma (CCS) is our number one priority. We believe every patient has a story, a life, a family, and a future and a home with us. We strive to support the patients, research and clinicians while keeping our mission at the forefront of our work. It is important that all CCS patients have access to the discoveries and connections we make to find a treatment for a better outcome.

Areas of Success and Hope.....

CCSF is named on a DOD grant aimed at collecting CCS surgical tissue and creating materials to be made available globally.

CCSF partnered with Cornerstone Pharma to conduct a Phase I/II trial where CCSF helped with travel. The phase I successfully completed in 2023.

CCSF has conducted several patient centered surveys where the CCS family shares lived experiences with the clinical community.
