LIPOSARCOMA SUPPORT NETWORK

The **Liposarcoma Support Network (LSN)** is committed to enhancing the survival and quality of life for people living with liposarcoma through patient-powered research, education and empowerment, global advocacy efforts, and guiding their journey toward a cure.

THIS YEAR'S ACHIEVEMENTS

PERSONALIZED SUPPORT FOR MEMBERS

Our community has grown to over 300 members from around the globe, each navigating a unique liposarcoma journey.

New members receive personalized guidance and resources needed to understand the complexities of this rare disease. This support ensures that individuals can face their diagnosis with greater clarity and confidence.

PATIENT & CAREGIVER SUPPORT GROUPS

Our patient support group offers a supportive space to connect with others living with liposarcoma, share experiences, and gain practical insights throughout the journey.

Our caregiver support group provides family members and loved ones with a place to connect, exchange resources, and receive support from others who understand the challenges of caregiving.

EDUCATIONAL RESOURCES

In addition to up-to-date information on our website, LSN held four expert webinars this year, hosted our first in-person event at Life Fest 2026 in Nashville, TN, and scheduled a Liposarcoma Day of Learning for 2027.

VIRTUAL TUMOR BOARDS

We hosted two Virtual Tumor Boards in conjunction with The Life Raft Group, bringing together experts and clinicians to collaborate on complex liposarcoma cases.

BIG NEWS!

GLOBAL LIPOSARCOMA PATIENT REGISTRY SET TO LAUNCH END OF 2026

This year, the **Liposarcoma Support Network** will launch a **patient registry** that will capture data and lived experiences from the global liposarcoma community.

IDENTIFY SHARED NEEDS

Reveal the common challenges liposarcoma patients face across the globe.

STRENGTHEN PATIENT-POWERED RESEARCH

Collect real-world data to help improve care and accelerate the development of new treatments.

DEEPEN UNDERSTANDING OF THE DISEASE

Track outcomes and experiences over time to better understand disease progression and QOL.

GUIDE BETTER CARE & TREATMENT

Inform care pathways and improve treatment decision-making.
