# NLMSF-SPAGN International Leiomyosarcoma Research Roundtable

## Advancing LMS Research Through Global Collaboration

A global initiative bringing together the Sarcoma Research Community for a collaborative focus on the future of Leiomyosarcoma investigational research and clinical trials.

## Our Mission

- Bringing together sarcoma experts from around the world for a Leiomyosarcoma -focused meeting.
- Discussing and understanding the current state of LMS research and treatment modalities relative to diagnosis, treatment challenges, clinical trial concepts/design.
- Developing work plans within the five Workgroups to address issues/unmet needs, to advance precision LMS research and patient-treatment protocols.

## Research Workgroups

- LMS Cell Lines and Patient-Derived Xenograf Models
- Clinical Trial Assessment
- Multi-Omics
- Gynecologic LMS and STUMP
- Imaging Strategies and Radiomics

## Roundtable Publications

**2026**

*Management of Soft Tissue and Visceral Leiomyosarcomas*

**2021**

*Unmet Medical Needs and Future Perspectives for Leiomyosarcoma Patients: A Position Paper from the National Leiomyosarcoma Foundation and Sarcoma Patients EuroNet*

**Explore More LMS Research** | Access curated publications and research highlights

**Supporting the Next Generation of LMS Researchers**

**NLMSF annual early career awards in recognition of young researchers / investigators in the field of LMS Research:**

- Early Career Award
- Brian Van Tine, MD Early Career Faculty Award for LMS Research Excellence
