

Bone Cancer Research Trust

WHO WE ARE

The Bone Cancer Research Trust offers hope to people affected by **primary bone cancer**.

Our **2022-2032 strategy** places our patients upfront and central across all our activities.

Vision

A world where primary bone cancer is cured

Mission

To save lives and improve outcomes for people affected by primary bone cancer through **research, information, awareness & support**.

RESEARCH

Since 2006, we have committed over **£12.5 million** to research, with the aim of improving our understanding of this disease, developing kinder and more effective treatments and, ultimately, achieving a cure.

Our **Patient & Public Involvement Panel** drive this research, they identify key research priorities, shape projects and guide funding decisions.

Through PPIP, **lived experiences** are brought to the forefront of the research we fund.

SUPPORT

We offer a **range of support activities** for anyone affected by a diagnosis:

- support line
- virtual & digital support groups
- 'get-togethers'
- patient conference
- opportunities to share stories
- non-means tested financial assistance
- travel grants to help with travel costs for UK patients undergoing Proton Beam Therapy or enrolled in a clinical trial.

AWARENESS

Too many patients experience **delayed diagnosis**.

INFORMATION

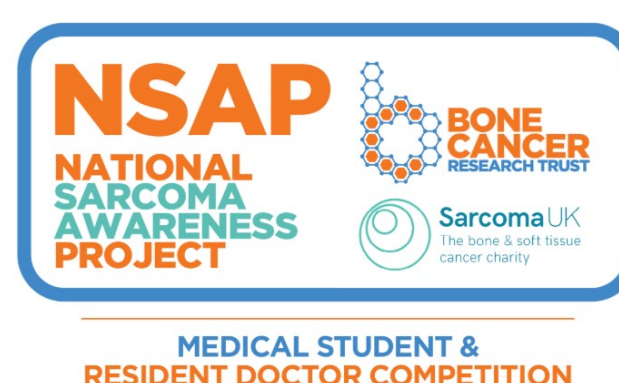

We provide **accredited, high-quality, evidence-based** and **up to date information**, across all sub-types of primary bone cancers and tumours.

The **Patient Information Forum**, is the UK's only assessed quality mark for health information.

We raise awareness amongst the healthcare professionals of today and of the future through our **dedicated information & resources**.

The **National Sarcoma Awareness Project** aims to educate medical students and early years resident doctors about sarcoma.

Equipping them with the skills to spot these cancers and understand how they are managed.
