SARKOMFÖRENINGEN

The Sarcoma Contact Nurse* Day

**In Swedish healthcare the "Contact Nurse" guides patients through the medical system from diagnosis through treatment, serving as their core point of contact*

Every year, the Swedish Sarcoma Association organises a two day event for contact nurses, physiotherapists and occupational therapists working with sarcoma patients.

Through talks, interactive workshops and a shared dinner, the initiative aims to strengthen professional networks and promote collaboration in sarcoma care.

Key outcomes:

A stronger professional network
The event creates opportunities for healthcare professionals from different disciplines and hospitals to connect and build professional networks.

Knowledge exchange and shared learning
Expert talks and workshops provide opportunities to gain new knowledge, discuss clinical challenges and share practical experiences.

Stronger collaboration across disciplines
The event encourages a more holistic approach to supporting patients throughout their care journey.

Why Is This Important?

- Creating opportunities for healthcare professionals to learn from one another and collaborate is central for improving sarcoma care
- By investing in professional networks and shared knowledge, the initiative aims to strengthen patient-centred care and overall sarcoma care.
