

TOGETHER FIGHTING
SARCOMA

YOU ARE **NOT** ALONE!

“**Together Fighting Sarcoma**” is an independent non-government patient organization, which main aim is to fight for sarcoma patients` rights for early diagnosis, quality and adequate treatment, psychological support.

It is the first association specially dedicated to Bone & Soft Tissue Sarcoma in Bulgaria.

The organization was founded in May 2022 in loving memory of our 15-year-old son -Niki, who was diagnosed with osteosarcoma. Being on the front row of this rough battle, we found out that primary bone and soft tissue sarcomas in both children and adults are not well known in Bulgaria.

OUR MAIN PROJECTS

- ✓ **Dedicated website** with all essential information about most common types of sarcoma at one place. It was quite hard for sarcoma patients in Bulgaria to find what is sarcoma - what are the symptoms, are there any clinical trials, how they can find other people with sarcoma diagnosis...
- ✓ We built a **society of people affected by sarcoma** - a place where people can discuss topics they are interested in, can find support or can receive advice. We have more than 600 members in this society.
- ✓ Program for **free psychological support for sarcoma patients**. We know how hard is for people affected by the disease and their families to go through that difficult journey of treatment and changes, to remain focused and to think positively. We engaged professional psychologists to help those who want in best possible way completely, free of charge.
- ✓ **Adaptation of materials**, leaflets, articles, best practices from all over the world, that can help sarcoma patients in their treatment to be more informed.
